

*“A Technological Breakthrough
for Indoor Air Quality”*

What Does CAS Offer?

Our exclusively powerful ozone generators allow administrators the ability to measurably improve the health and sanitation of their trains and stations, in a way that is safer, faster, and more economical in comparison to traditional methods. CAS offers new, innovative products, training, custom installations, and treatments to meet your needs.

Why Use CAS?

Consumer studies are finding that harmful germs and pests are increasingly becoming present in the world's public transportation systems each day. Now decision makers have the ability to take preventative steps to protect their patrons and staff from the risk of routine infection.

Who is CAS?

Clean Air Systems is a service provider of the leading technological advancement in bacterial, viral, pest, odor, and mold eradication. Our mission is to provide the cleanest environment possible for the world's passenger trains, and their related facilities.

Passenger Trains and Train Stations

“Remove harmful germs, pests, and odors in your trains, stations, and employee areas!”

Our technology will leave you with the most sanitized environment possible by eradicating:

- **Bacteria** such as: STAPH (including MRSA), E. Coli, Streptococcus, and Pneumococcus.
- **Viruses** such as: Influenza, the Norovirus, Rhinovirus, and Hepatitis.
- **Pests** such as: Bed bugs, dust mites, spiders, flies, ants, head lice, fleas, and cockroaches.
- **Unpleasant odors** from smoke, moisture, chemical, and bacteria build up.
- **Toxigenic mold** that is visible and mold behind walls, such as: Stachybotrys Chartarum.

Our products are able to clean and disinfect:

- Seating, handrails, headrests, cushioning, and handles.
- Windows, walls, ceiling, shelving, and flooring.
- Restrooms, break rooms, cafeterias, and dormitory rooms.
- Offices, storage space, and other multi-use areas.
- Computers, telephones, and other electronic controls.

“Provide your patrons and employees with the cleanest environment possible by sanitizing every cubic inch of your trains, train stations, and all the items within them!”

“Our system is safe for the environment, furnishings, and electronics. It leaves absolutely no residue and is 100% chemical and pesticide free!”

Use of Ozone as a cleaning agent
is government approved.
